✉ smehrpou@gmu.edu **G** sahar.mehrpour **GitHub** saharmehrpour.github.io **in** sahar-mehrpour **Q** SaharMehrpour

Software Engineer and DevTools specialist with 7+ years of experience building developer-facing tools, IDE plugins, and front-end applications. PhD-trained with industry experience at Google, combining research rigor with production engineering.

Experience

Co-Founder and CTO

Fairfax, VA

OurCode Inc.

June 2024 - Jan 2025

- Co-founded and led development of ActiveDocumentation, a developer tool for documenting and enforcing design decisions directly in source code.
- Defined technical architecture and product roadmap, evolving a research prototype into an industry-ready developer tool.
- Recruited and mentored 8 software developers, leading implementation, experiments, and iterative improvements across frontend, IDE plugins, and analysis pipelines.
- Conducted 100+ customer discovery interviews with engineers, managers, and tech leads to validate product direction and prioritize features.
- Secured \$50K NSF I-Corps funding and applied lean startup methods to assess product-market fit.

Software Engineer Intern

Remote, US

Google

June 2023 - Sep 2023

- Designed and implemented interactive data visualizations for log analysis in Google Search Generative AI.
- Built user-friendly React interfaces enabling non-technical users to analyze behavioral log data independently.
- Collaborated with cross-functional teams to refine UX and data presentation.
- Tech: TypeScript, React, Golang

Software Engineer Intern

Remote, US

Google

Sep 2022 - Dec 2022

- Developed a Chrome extension to support users with cognitive impairments through labels, phrase highlighting, and read-aloud features.
- Integrated a TFLite ML model for phrase detection in collaboration with ML and accessibility teams.
- Tech: TypeScript, Python, C++, TensorFlow Lite, WebAssembly

Software Engineer (Developer Tools and Research)

Fairfax, VA

George Mason University

May 2017 - May 2024

- Designed and built developer tools for documenting, visualizing, and enforcing design decisions in code.
- Developed IDE plugins (VSCode & IntelliJ) and a supporting web application used in studies and evaluations.
- Implemented static analysis and rule-checking pipelines for JavaScript and TypeScript codebases.
- Led user studies and usability evaluations to inform product and UI design.
- Mentored students contributing production-quality features.
- Tech: TypeScript, JavaScript, Java, React, Node.js, WebSocket, Redux, VSCode API, IntelliJ SDK

Software Engineer (Data Visualization)

Salt Lake City, UT

University of Utah

Jan 2017 - May 2017

- Created clinical data visualizations to aid medical workers in prescribing treatments based on similar patients.
- Technologies: TypeScript, Python, JavaScript, D3.js, Phovea Framework

Skills

- **Core Areas:** Developer Tools, Front-End Engineering, IDE Plugins, Static Analysis, Data Visualization
- **Languages:** TypeScript, JavaScript, Java, Python, Golang (familiar), C++ (familiar)
- **Frameworks & Tools:** React, Node.js, Redux, WebSocket, VS Code API, IntelliJ Plugin SDK, Chrome Extensions, TensorFlow Lite, Testing libraries (Jasmine, Jest, Mocha, Sinon)

Education

PhD in Computer Science – <i>George Mason University</i>	<i>2024</i>
MSc in Computer Science – <i>University of Manitoba, Canada</i>	<i>2016</i>
BSc in Computer Science – <i>Sharif University of Technology, Iran</i>
